Jbx Signature Overview

 Click to jump to signature section

AV Detection:

- Multi AV Scanner detection for submitted file
- Antivirus / Scanner detection for submitted sample
- Machine Learning detection for sample
- Machine Learning detection for dropped file

Networking:

- Connects to many ports of the same IP (likely port scanning)

System Summary:

- PE file contains section with special chars

Data Obfuscation:

- Yara detected Costura Assembly Loader
- .NET source code contains potential unpacker

Malware Analysis System Evasion:

- Query firmware table information (likely to detect VMs)
- Tries to detect sandboxes / dynamic malware analysis system (registry check)
- Queries sensitive video device information (via WMI, Win32_VideoController, often done to detect virtual machines)
- Tries to detect virtualization through RDTSC time measurements
- Queries sensitive disk information (via WMI, Win32_DiskDrive, often done to detect virtual machines)

Anti Debugging:

- Tries to detect sandboxes and other dynamic analysis tools (window names)

HIPS / PFW / Operating System Protection Evasion:

- Allocates memory in foreign processes
- Injects a PE file into a foreign processes
- Writes to foreign memory regions
- Tries to shutdown other security tools via broadcasted WM_QUERYENDSESSION
- .NET source code references suspicious native API functions
- .NET source code contains process injector

Stealing of Sensitive Information:

Yara detected RedLine Stealer

- Found many strings related to Crypto-Wallets (likely being stolen)
- Tries to harvest and steal browser information (history, passwords, etc)
- Tries to steal Crypto Currency Wallets

Remote Access Functionality:

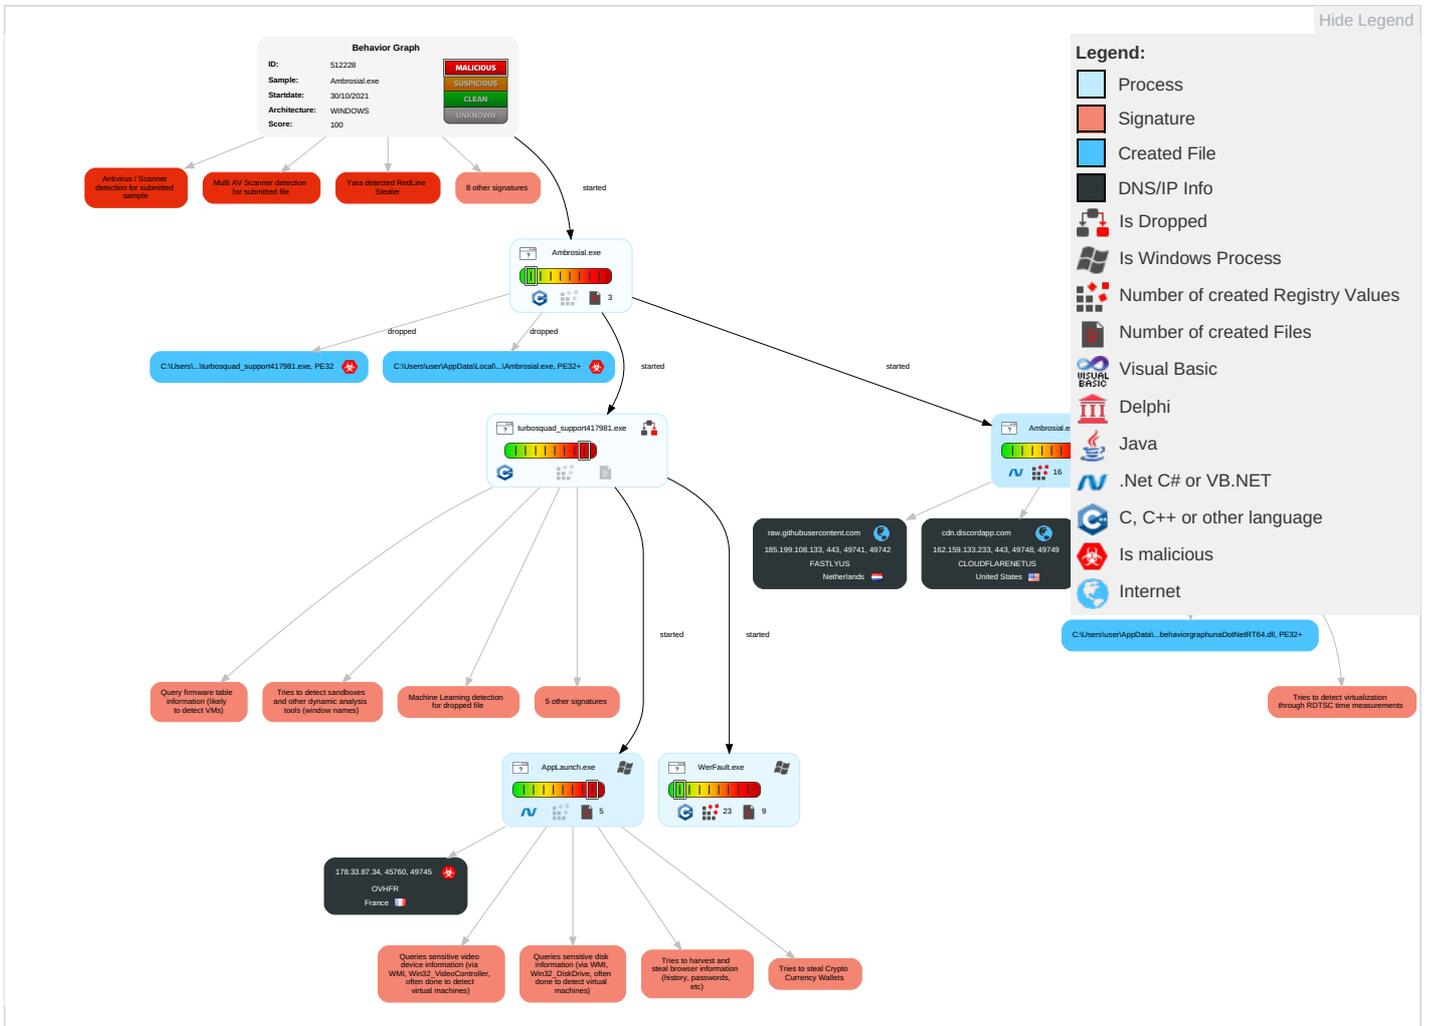

Yara detected RedLine Stealer
